

Material feeder EP30/85

Those cable feeders are suitable for installation with our ISOMAT, Autocut and other machines. Since the Isomat or Autocut are not suitable to pull the cable of the reel, our material feeder will get this job done. Most important is the steady and constant feed of the cable to the attached machines. The feeding is regulated by an installed dancer.

Technical data

| | |
|-----------------------------|-----------------------|
| Basic equipment: | FEEDER EP30/85 |
| Part-number: | 10201 |
| Delivery time : | 3 weeks |
| Technical data: | |
| - Material diameter max. | 30 mm |
| - Material width | 85 mm |
| - Belt-drive | 70 m/min |
| Pneumatic: | |
| - Air pressure | 6 bar |
| Electrical Data: | |
| - Voltage | 230V 50/60Hz |
| - Connected load | 450VA |
| - Interface | To Autocut or ISOMAT |
| Dimensions: | |
| - length | 520 mm |
| - width / width with dancer | 670 mm / 1550 mm |
| - height | 510 mm |
| - weight | 60 kg |
| Tools: | |
